Logging in and finding your way around

This page explains how to log in to FLLTools and how to find your way around the tool. In the instructions we use the link **yourevent.flltools.nl**. Replace "yourevent" with the name of your event.

Logging in

Go to https://**yourevent**.flltools.nl/login.

- Enter your e-mail address in **Email (1)** and your password in **Password (2)**.
- Tick **Remember Me (3)** if you want to stay logged in on this device. Don't do this on a shared computer.
- Forgot your password? Click **Forgot your password? (4)** and you'll receive an e-mail to set a new password.
- Click **Login (6)**.

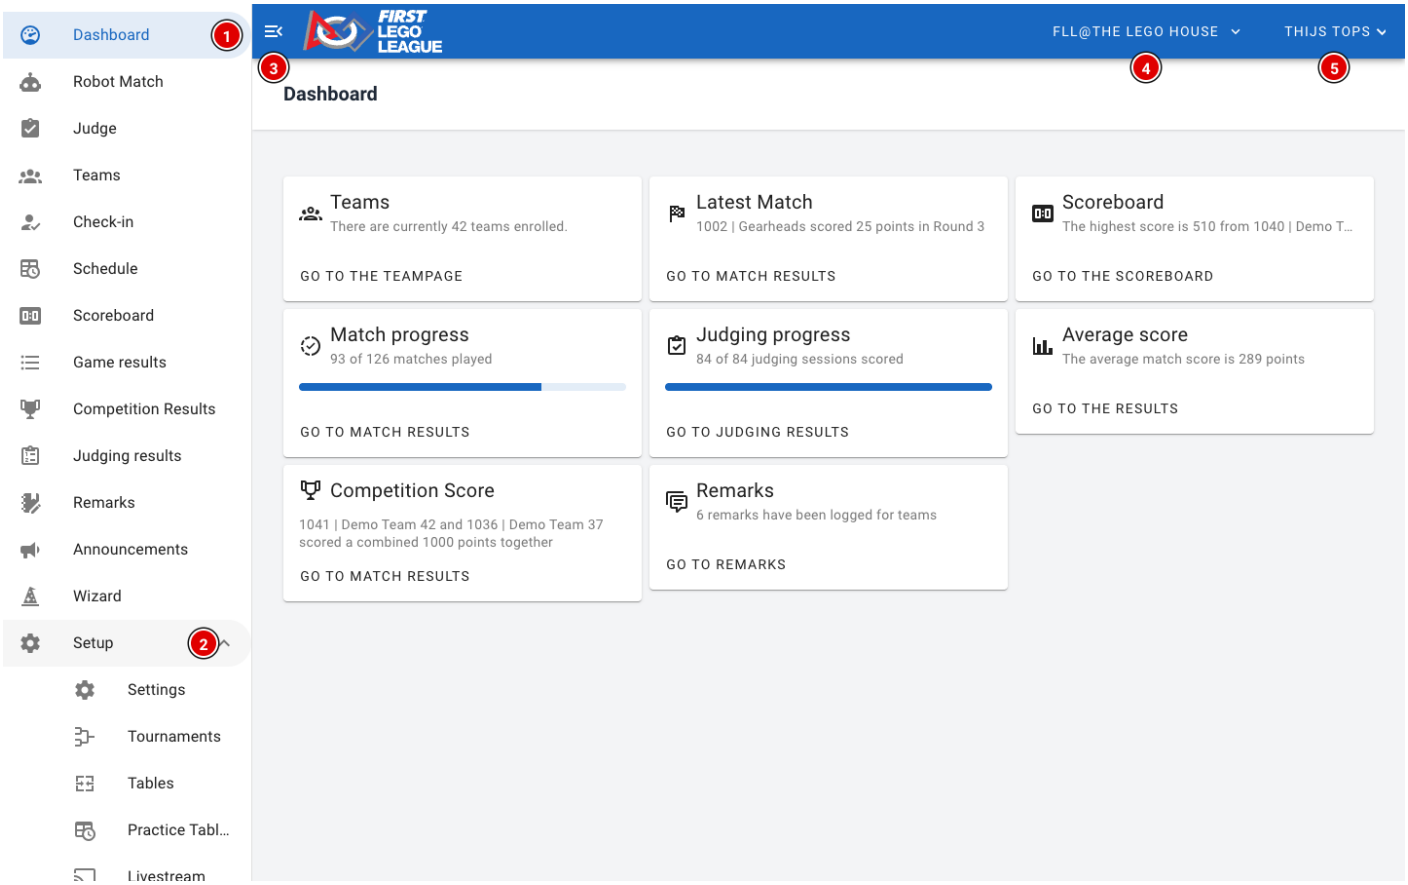

After logging in you arrive at the dashboard. If there is no tournament yet and you are allowed to create tournaments, the Setup Wizard opens automatically (see the page The Setup Wizard).

FLLTools Unified Login

For volunteers who help at several (regional) finals, and for regional partners / operational partners, there is the **FLLTools Unified Login**. With it you log in to every event with the same details. Click **Login with SSO (5)** and log in on the page that opens. You are then taken back to FLLTools automatically.

Would you like to use this? Send an e-mail to thijs@flltools.com and you'll receive a login.

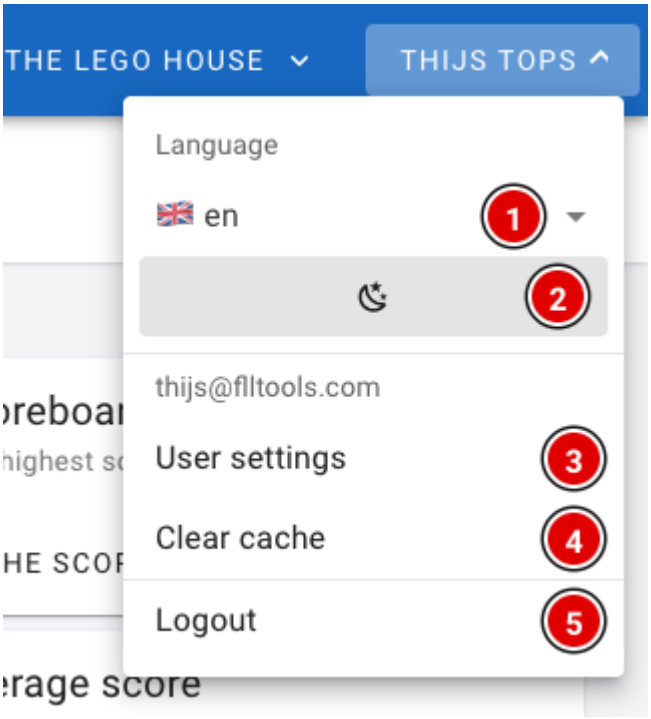

Finding your way around

- **Menu (1)**: the main menu is on the left. Here you find everything you need during the event, such as Robot Match, Teams, Schedule and the Scoreboard. You only see the parts your account has permission for and that are switched on as a module.
- **Setup (2)**: this contains all settings for the preparation, such as Settings, Tournaments, Tables, Rounds, Jury, Users and Exports.
- **Menu button (3)**: collapses the menu so you have more space. On a phone or tablet this button opens the menu.
- **Tournament (4)**: shows which tournament you are working in. If you have several tournaments, you can switch here. See the page Creating the tournament.
- **Your name (5)**: opens the user menu.

The **Dashboard** gives an overview of the event: the number of teams, the latest match, the highest score, how many matches and judging sessions have been entered, and how many remarks there are. The buttons on the cards take you straight to the matching page.

The user menu

- **Language (1)**: choose the language of the tool: English, Dutch, Belgian (Flemish) or French. The buttons and icons are in the same place in every language. This manual uses the English names.
- **Dark mode (2)**: switch between a light and a dark view. Handy in a dark venue.
- **User settings (3)**: your profile page, see below.
- **Clear cache (4)**: wipes all data the tool has stored on this device. Only use this if the tool behaves strangely, for example after an update.
- **Logout (5)**: log out on this device.

> Be careful with **Clear cache** on a referee tablet! Results entered offline that haven't been sent yet are wiped too. First check that all results have been uploaded.

Your profile

Through **User settings** you reach your profile page.

Profile Information

Update your account's profile information and email address.

SAVE

Notifications

Notifications in your browser allow us to send you messsages

During the tournament we can keep you up to date using these notifications. They work on Android, for Apple devices, we need to look how to do this. Make sure that your browser has the permission to display notifications.

ENABLE NOTIFICATIONS 2

Theme Preference

Customize the color theme of the application

Select a theme to personalize your experience. If not set, the tournament's default theme will be used.

Choose Theme 3
Blue

Clearing the theme will use the tournament default or system default theme.

Update Password

Ensure your account is using a long, random password to stay secure. After saving you will be automatically logged out

Current Password 4

New Password

Confirm Password

SAVE

Two Factor Authentication

Add additional security to your account using two factor authentication.

You have not enabled two factor authentication.

When two factor authentication is enabled, you will be prompted for a secure, random token during authentication. You may retrieve this token from your phone's Google Authenticator application.

ENABLE 5

- **Select a new photo (1)**: set a profile photo. Below it you can change your name and e-mail address. Click **Save** to save.
- **Enable notifications (2)**: receive notifications in your browser during the event, for example announcements from the organisation. Your browser asks for permission; click allow. This works on Android and on a computer.
- **Choose Theme (3)**: choose a colour theme for your account. If you don't choose one, the tournament's default theme is used.
- **Update Password (4)**: change your password. After saving you are logged out automatically and log in again with your new password.
- **Two Factor Authentication (5)**: switch on extra security. You scan a QR code with an authenticator app on your phone (for example Google Authenticator) and enter a code from that app when you log in. Keep the recovery codes you receive somewhere safe, for example in a password manager.

At the bottom of the page you see on which devices you are logged in. **Logout all other devices** logs you out everywhere except on the device you are using now. Handy if you have been logged in on a shared computer.
